**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Richard Sharkey (Reg. No. 32, 629) on May 28, 2003.

2. The application has been amended as follows:

Insert the phrase "so that the synthetic double stranded oligonucleotides are depleted of synthetic failures and the sequence fidelity of the synthetic double stranded oligonucleotides is improved" between "synthetic failures" and period in last line of claim 1.

3. The following is an examiner's statement of reasons for allowance:

Claims 1, 3, and 5-14 are allowable in light of the applicant's amendments and arguments (see pages 6 and 7 of applicant's remarks filed on February 26, 2003) and the examiner's amendments. The closest prior art in the record are Huber *et al.*, (Anal. Chem., 68, 2959-2965, 1996), Tang *et al.*, (US Patent No. 5,668,268, published on September 16, 1997) and Agabian *et al.*, (US Patent No. 5,770,714, published on June 23, 1998). These prior art either alone or in combination with the other art in the record does not teach or reasonably suggest a method for improving the sequence fidelity of the synthetic double-stranded oligonucleotides which comprises all limitations recited in claim 1.
